

OXIQA

COMPANY PROFILE

FEBRUARY 2024

TLP: WHITE ●

OXIQA

OXIQA is the leading Cyber Security solutions provider in the Maldives, focusing on bringing innovation to enable secure digital transformation & agile software development.

With a decade of expertise and experience in software architecture designing and implementation, we work with our clients through supporting their digital journey. As a company, who believes in learning and evolving, we work towards improving and building an innovative ecosystem that would be providing enterprise solutions to the clients.

We are passionate about what we do and strive to produce the **best solution.**

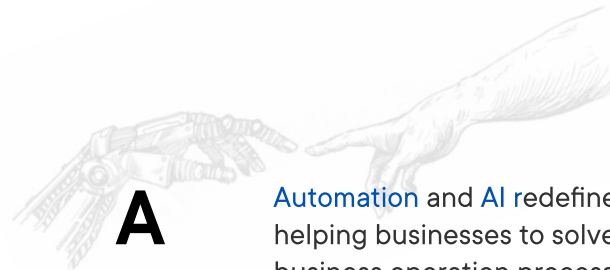

OX

Ox, the animal that can pull heavier loads, last longer and is steadier than any other domesticated animals. The quality needed for any technological solutions to sustain itself in the market and get customer retention.

IQ

Intelligence. The ability to acquire and apply knowledge & skills. This factors into the growing need for business Intelligence, artificial intelligence and machine learning to be embedded into any solution or service provided for clients for market penetration and business sustainability.

A

Automation and **AI** redefines our products and services, by helping businesses to solve issues across from simple business operation process to highly sophisticated products customised for specific needs.

Our Approach

We work towards empowering our clients with agile solutions using artificial and business intelligence and provide unprecedented levels of performance and customer delight to our clients. We are constantly evolving and learning to deliver innovative solutions to our clients through evidence based decision making process using big data analytics for optimal cost efficiency.

We ensure that the products we make, the actions we undertake are as challenging as it can be, so that our solutions and services would be improved, efficient, effective, evolved and optimised to the needs of our clients. Every partnership that we built is around creating a space for clients, customers and society to benefit and deliver better results.

Our Manifesto

Over the years we've thought a lot about how we balance being good humans with doing good work and running a good business.

02 Innovation

We live to discover the unknown and try out every new technology. Whether it's for us or for a client project, we thrive when we can combine our experience with a novelty to make a significant difference.

04 Never stop learning

Technology moves fast. Design moves on. So it's important to keep learning. We invest hundreds of hours each month into internal and external education sessions as we believe this is the best way for all of us to advance.

01 Make great work

We learn and teach each other all kinds of skills and processes every day. We're obsessive about quality of work, products, and our people.

03 See the bigger picture

With each project, we get a new perspective and a chance to be creative in overcoming obstacles. Our team has been growing each year, and lead teams with 5 or even more people.

05 Foster creativity

We are free to pursue our passion, to experiment, to fail and to learn from it. This kind of mindset supports employee initiatives on which many of our services and departments have been set-up.

Who we are

Ismail Kaleem

Managing Director

Kaleem is a globally recognized cybersecurity researcher acclaimed by Fortune 500 companies like Facebook, Microsoft, and LinkedIn for identifying critical vulnerabilities. Celebrated in the Maldives for enhancing national cybersecurity laws, his expertise spans Cyber Offense, including red teaming and ethical hacking, significantly securing telecommunications, government systems, and banking apps. Additionally, Kaleem contributes to Cyber Defense, improving security frameworks and raising cybersecurity awareness through education and consultancy, aiming for a safer digital world.

Mohamed Isaan

Chief Technology Officer

Isaan, with an MSc in IT and over 9 years as a full stack developer and DevOps expert, leads the technical team in crafting the company's tech strategy, emphasizing secure and efficient software development. His commitment to continuous learning and innovation is highlighted through his active participation in workshops and conferences. Notably, at the National Center for Information Technology in the Maldives, Isaan played a pivotal role in digital transformations like the E-Council project, which revolutionized public service efficiency through technology integration.

Hussain Jinan

Chief Operations Officer

Jinan has over 13 years experience in the field of sustainable development as well as the development of SME's. He brings immense experience in multi-sectorial backgrounds such as tourism, women empowerment, policy and strategic formulation and startups. He has been instrumental in implementing many SME development programmes in the Maldives, having worked closely with high profile clients from government as well as the corporate sector.

Mohamed Shareef

Director of Government & International Relations

Mohamed Shareef, as the former Minister of State, was instrumental in leading Maldives' Digital Development Plan 2021-2023, focusing on creating a comprehensive digital identity platform and setting up pivotal cybersecurity and data protection frameworks. His tenure marked significant strides in the nation's digital transformation. Now the Director of Government and International Relations at OXIQA, his previous governmental role underscored his expertise in ICT policy and infrastructure development. A University of Birmingham, UK, MEng graduate, Shareef's career reflects a deep commitment to advancing digital governance and inclusivity.

Hassan Junaid

Director of Sales & Marketing

Junaid, with a decade in consumer sales, specializes in customer services and channel sales, notably leading the launch of 4G and FTTH services at Dhiraagu. He founded the consumer sales team there, showcasing his leadership and strategic planning skills. Diversifying into digital marketing, he served as a consultant for Maldives.com, enhancing its online presence through social media campaigns. At OXIQA, Junaid continues to impact, notably with the success of MsgOwl, blending traditional and digital marketing strategies.

Hassan Zayan Azzam

Director of Cyber Defence, Incident Response, & Blue Team

Hassan Zayan Azzam, top graduate in Cyber Security from Staffordshire University, UK, is a leading professional in cyber security with over 5 years of experience. Currently directing the Cyber Defence Incident Response & Blue Team at OXIQA, Hassan is central to advancing security operations and developing defence strategies since 2023. Previously, as a Security Operation Centre Engineer for the Government of Maldives (2022-2023), he drafted the National Cyber Security Act and contributed to the National Cyber Security Agency's establishment, focusing on strategic cybersecurity planning and submarine cable protection.

Our Cyber Security Clientele

Service Portfolio

VAPT Services

VAPT involves a comprehensive evaluation of your IT infrastructure to identify and analyze potential vulnerabilities. Penetration testing simulates real-world attacks to test the effectiveness of security measures, ensuring robust defense against cyber

Security Policy Auditing & Authoring

This service entails a thorough review of your existing security policies, identifying gaps and inefficiencies. We also assist in the development and authoring of comprehensive security policies tailored to your organization's specific needs and compliance requirements.

Cloud Security Audit & Compliance Testing

This service provides comprehensive auditing of your cloud infrastructure to ensure that it adheres to best security practices and complies with relevant industry standards and regulations. We assess the security posture of your cloud environment, identify potential vulnerabilities, and provide actionable recommendations to mitigate risks. This service is essential for maintaining the integrity and compliance of your cloud operations.

Source Code Auditing

Our source code auditing service rigorously examines your software code to identify security vulnerabilities, coding errors, and compliance issues, ensuring the security and integrity of your applications.

Network Architecture Design

Our network architecture design service involves the development of a secure, scalable, and efficient network infrastructure tailored to your specific business needs and operational requirements.

Digital Forensics & Incident Response

Our team of experts specializes in investigating cyber incidents, uncovering the root cause, and providing swift response measures. We also offer digital forensics services to analyze and preserve digital evidence for legal and compliance purposes.

WAF Solution Engineering

Our WAF Solution Engineering service involves the design, implementation, and management of Web Application Firewalls to protect your web applications from a variety of threats. This service includes custom configuration to suit your specific application landscape, ensuring robust protection against SQL injection, cross-site scripting, and other web-based attacks while maintaining optimal application performance.

Cyber Security Operations Center (Coming Soon)

This service will offer round-the-clock monitoring and management of your IT environment, utilizing a state-of-the-art Security Operations Centre to proactively detect and respond to threats.

Security Architecture Design

We provide bespoke security architecture design services, creating robust security frameworks that align with your business objectives and technological environment, ensuring resilience against evolving cyber threats.

APT Simulation & Red Teaming Services

Advanced Persistent Threat (APT) simulation and red teaming involve simulated cyber attacks to test and improve your organization's defenses against sophisticated and prolonged threats.

Information Security Management System

Our service assists organizations in achieving and maintaining ISO 27001 compliance, encompassing the establishment, implementation, maintenance, and continuous improvement of an Information Security Management System (ISMS).

Managed Security Services

As a Managed Security Service Provider, we offer comprehensive security solutions, including continuous monitoring, threat intelligence, incident response, and security advisories, to protect your organization from cyber

Firewall Auditing

A critical service that involves a thorough examination of your firewall configurations and policies. We evaluate the effectiveness of your firewall rules and settings, identify misconfigurations and unused or outdated rules, and provide insights for optimization. This service ensures that your firewalls are configured for maximum security and efficiency, safeguarding your network against unauthorized access and various cyber threats.

IT Consulting

Our IT consulting services focus on identifying the root causes of IT issues and providing effective remediation strategies. We offer expert guidance to enhance your IT infrastructure's performance and security.

Cyber Security Training

We offer comprehensive cybersecurity training programs designed to enhance the security awareness and skills of your workforce, covering a wide range of topics from basic cyber hygiene to advanced security protocols.

Managed XDR Services

We offer advanced threat detection, analysis, and response services. Utilizing cutting-edge technologies, our XDR solutions provide a holistic approach to security, extending beyond traditional endpoint detection.

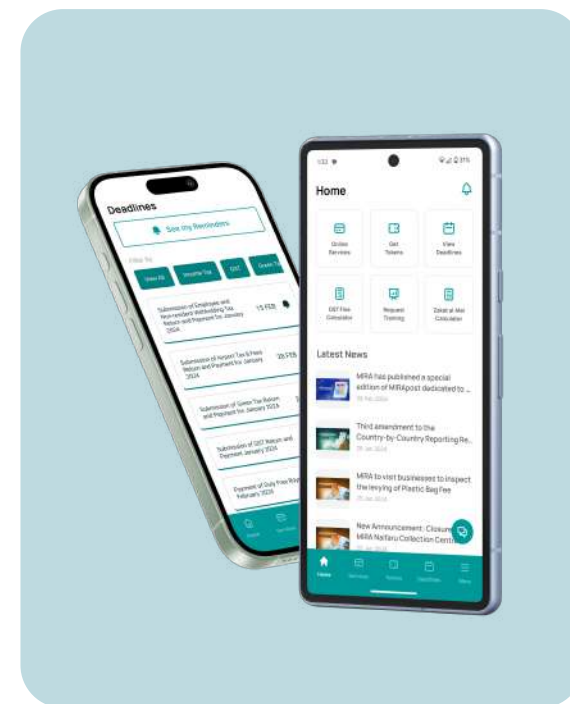

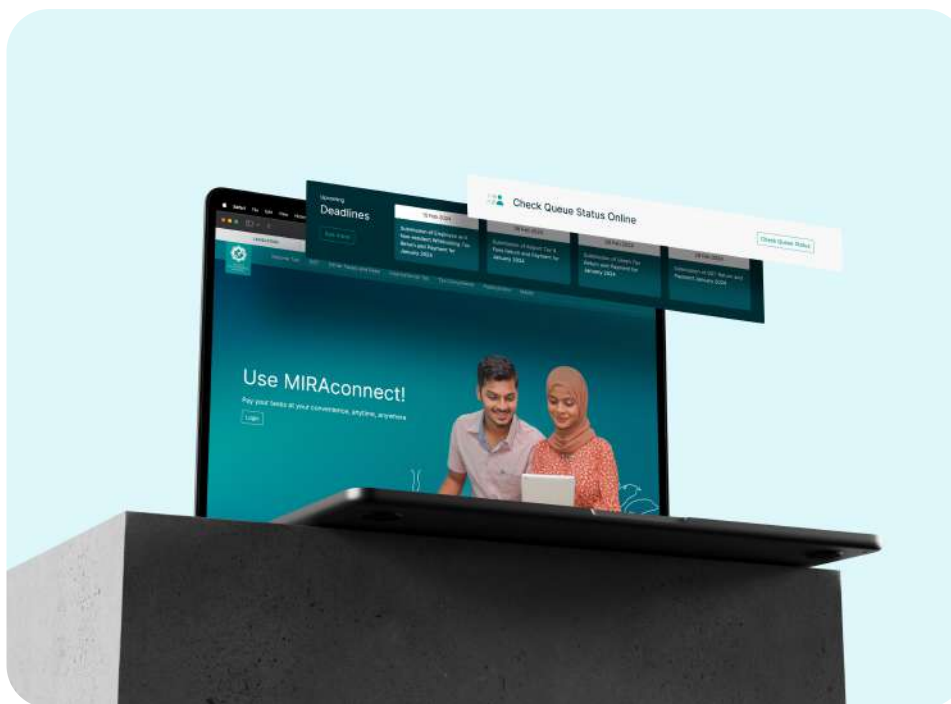

Our UX Clientele

Maldives Inland Revenue Authority

Website & Mobile Application

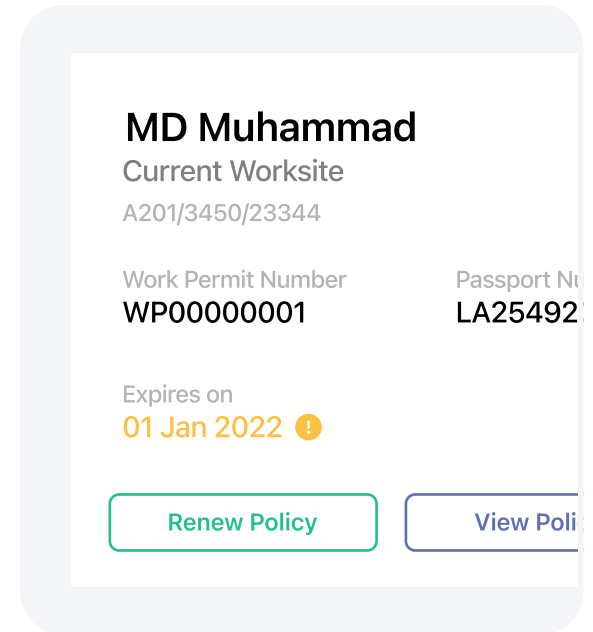

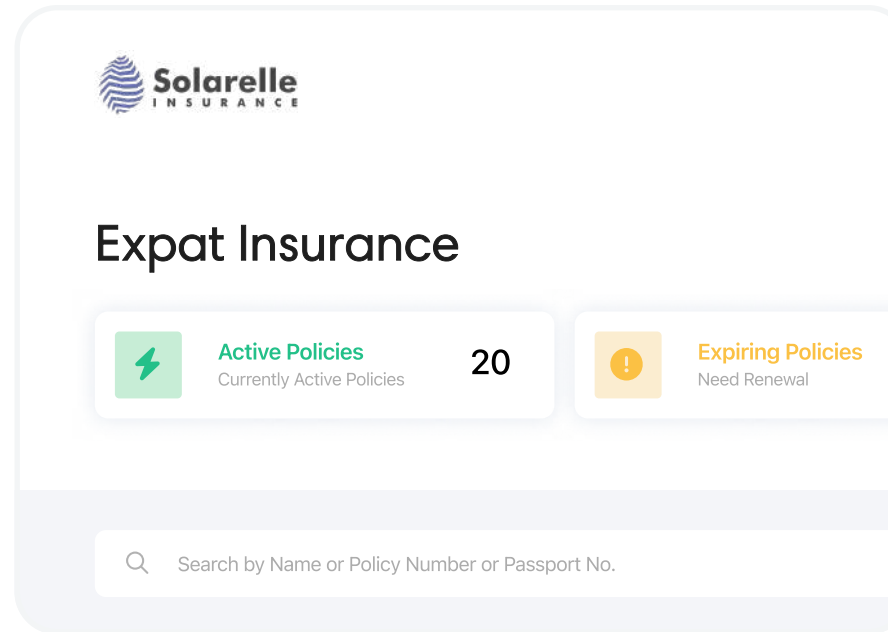

MIRA revolutionized the way citizens interact with their nation's tax system through a comprehensive website and mobile application. Designed with the user in mind, MIRA simplifies tax filing, payments, and inquiries with its intuitive interface and seamless navigation. The platform integrates cutting-edge security features to protect sensitive information, offering real-time updates on tax laws and personalized tax-saving suggestions. By digitizing the tax process, MIRA has significantly reduced wait times, improved compliance rates, and fostered a more transparent relationship between the tax authority and the public.

Solarelle

Internal Portal

Solarelle is an innovative internal portal developed for a leading insurance company, designed to streamline operations and enhance employee engagement. This portal serves as a one-stop solution for employees, offering access to a wide range of tools and resources, including claims processing, customer relationship management, and internal communications. With its advanced analytics feature, Solarelle enables managers to track performance metrics and identify trends, facilitating informed decision-making. The platform's intuitive design and personalized user experience have significantly boosted productivity and collaboration within the company.

Capricer

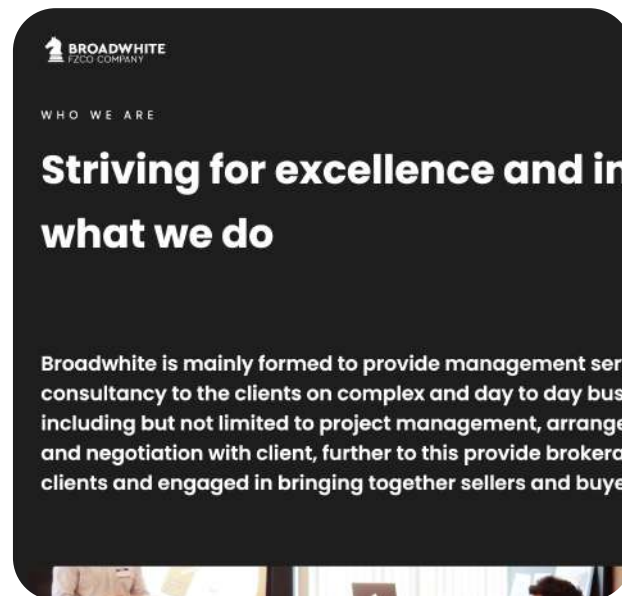

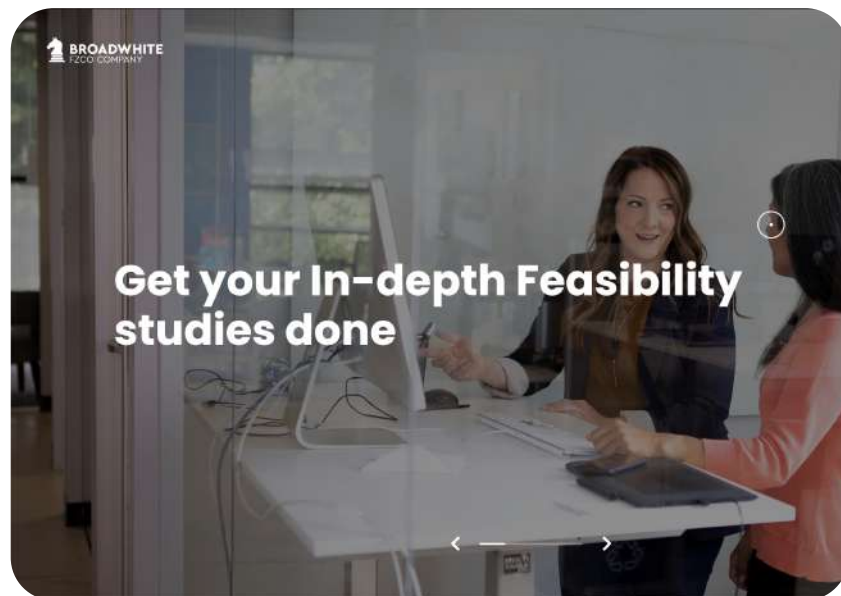

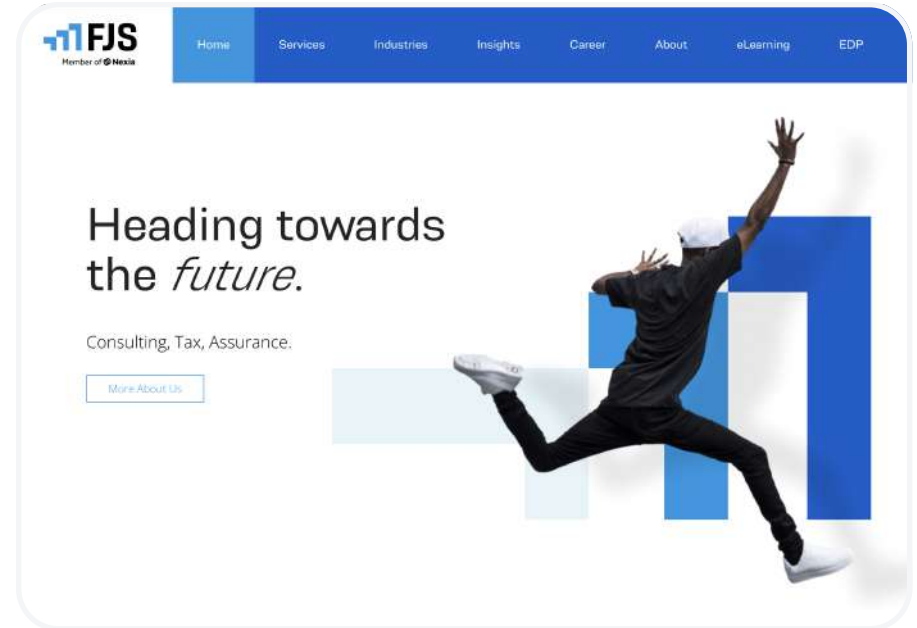

Corporate Website

Capricer's corporate website stands as a beacon of brand identity and professionalism. Designed with elegance and sophistication, the website reflects Capricer's commitment to excellence and innovation. It offers visitors a comprehensive insight into the company's services, achievements, and core values through immersive content and interactive features. The website also includes an advanced portfolio gallery, showcasing Capricer's projects and collaborations, which serves to attract potential clients and partners by highlighting the company's expertise and success stories.

FJS

Corporate Website

FJS's corporate website is a testament to the company's forward-thinking approach and industry leadership. With a clean, modern design, the website offers a user-friendly experience, guiding visitors through the company's history, services, and vision for the future. Interactive elements, such as video testimonials and detailed case studies, provide a deeper understanding of FJS's impact and capabilities. The website also features a dynamic news section, keeping stakeholders informed about the latest developments, achievements, and insights from the company.

Broadwhite

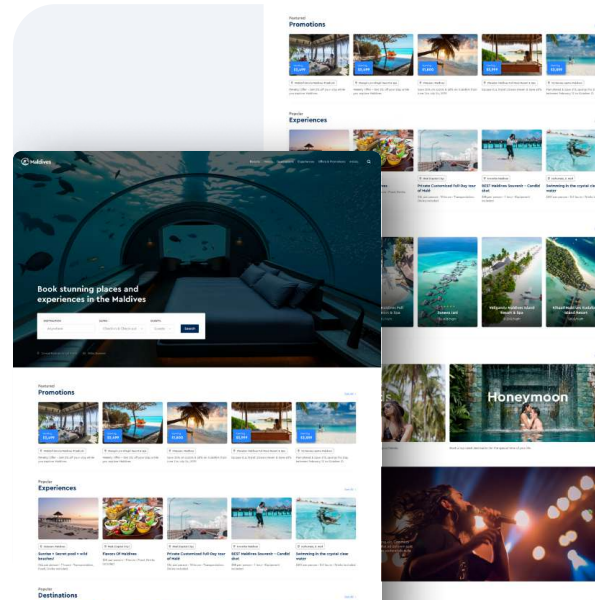

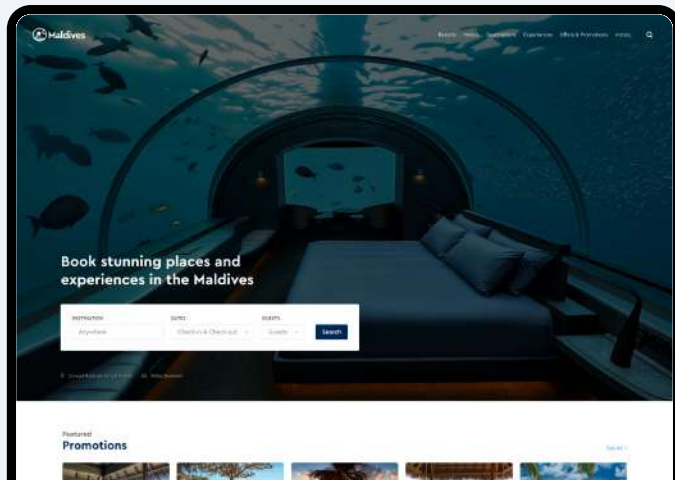

Corporate Website

Embodies the company's innovative spirit and commitment to quality. The site's minimalist design, complemented by high-resolution imagery and engaging content, provides an immersive experience for visitors. It effectively communicates Broadwhite's mission, showcases its diverse product range, and highlights its dedication to sustainability and community involvement. Optimized for all devices, ensuring a seamless experience for users on the go, and includes interactive contact forms and live chat support, making it easier for clients and partners to connect with the company.

Big-Small Storage

Corporate Website

A vibrant and user-friendly platform designed to cater to both individual and business storage needs. It stands out with its dynamic space calculator, which helps users determine the ideal storage unit size based on their items, and a straightforward booking system for instant reservations. The website features a clean, navigation-friendly interface, showcasing various storage solutions, from personal lockers to large-scale warehousing. Through engaging testimonials and interactive tours, Big-Small Storage builds trust with potential clients, emphasizing their security features, flexible terms, and accessible customer service, making storage solutions hassle-free and reliable.

Maldives.com

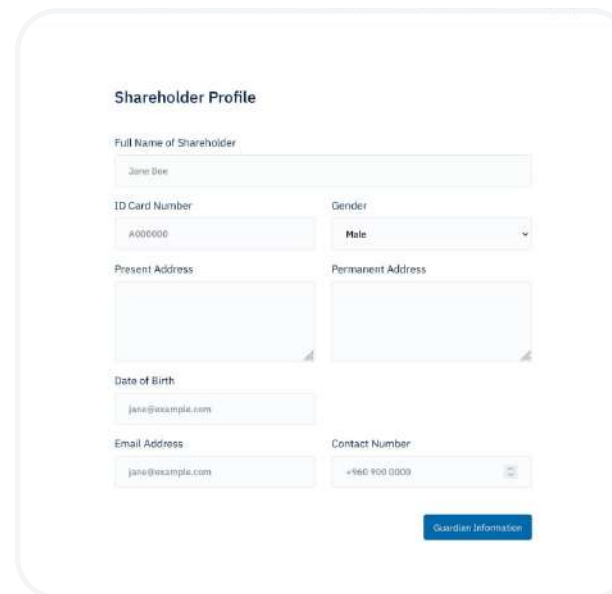

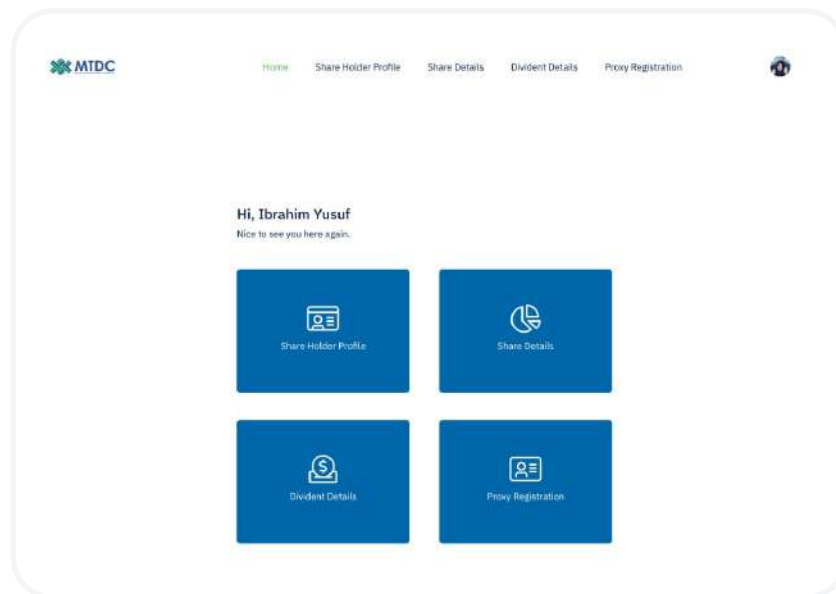

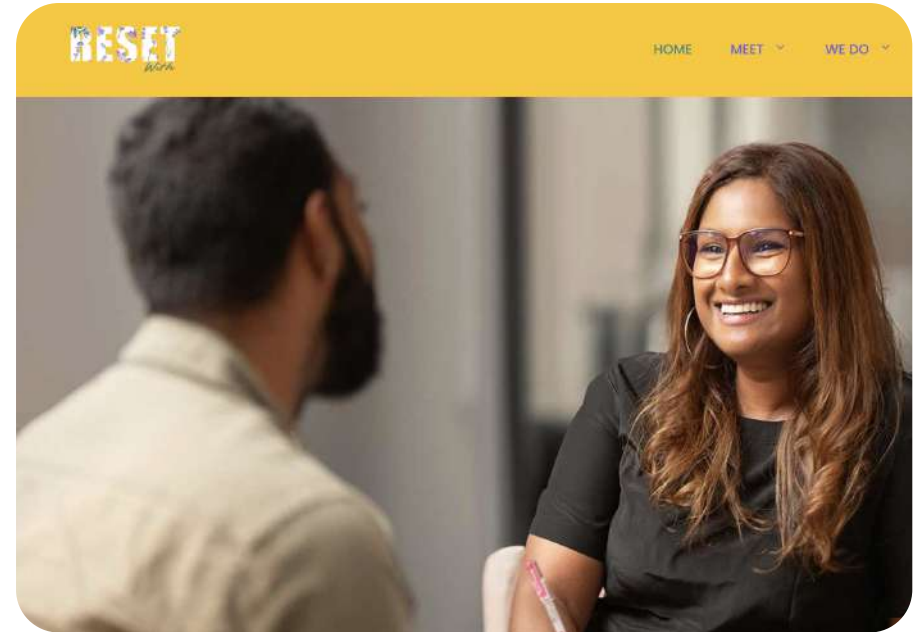

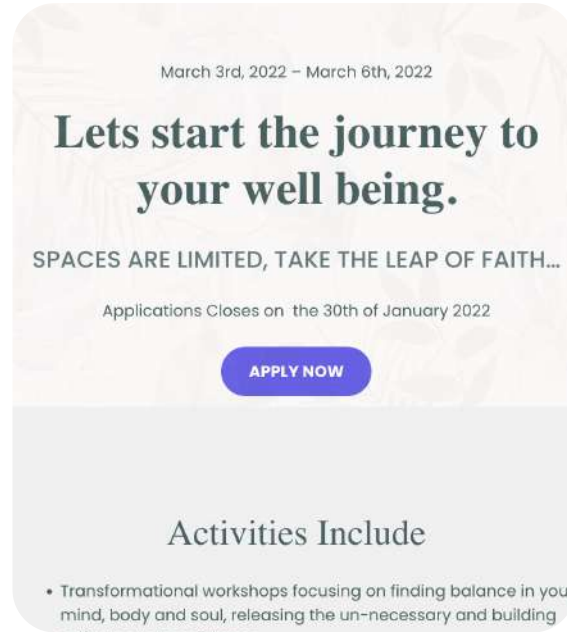

Hospitality and Booking Engine

Maldives.com is the ultimate online destination for planning and booking a dream Maldivian getaway. This comprehensive platform combines breathtaking imagery with user-friendly design, inviting visitors to explore the islands' luxurious resorts, overwater bungalows, and unique experiences. The site's powerful booking engine offers customized search filters, including by island, resort type, and activity, ensuring a personalized vacation planning experience. With exclusive deals, real-time availability, and a wealth of travel tips and cultural insights, Maldives.com makes holiday booking seamless and exciting, promising an unforgettable journey to the heart of the Maldives.

Reset with Umana

Website

Reset with Umana offers a sanctuary online for those seeking to rejuvenate their mind, body, and spirit. The website serves as a portal to wellness, featuring a serene design that echoes the tranquility of its retreats. Visitors can explore a variety of programs, including mindfulness meditation, yoga workshops, and nutritional guidance, each designed to foster wellbeing and personal growth. The site includes immersive video content, client testimonials, and detailed facilitator profiles, providing a comprehensive view of the Reset experience. With easy navigation and interactive booking options, Reset with Umana invites users to embark on a journey of self-discovery and renewal.

MTDC

Shareholder Portal

A sophisticated platform designed to enhance investor relations and corporate transparency. This secure, interactive site provides shareholders with immediate access to financial reports, stock performance data, and corporate news updates. Featuring a dashboard customized to individual shareholder profiles, the portal offers insights into dividend history, voting rights, and upcoming shareholder meetings. With tools for direct communication with the corporate team and options for electronic voting on resolutions, the portal fosters a strong, informed, and engaged investor community, underscoring the company's commitment to accountability and shareholder value.

Products Products Products Products Products

Message Owl

A secure SMS Messaging Console

Message Owl is your all-in-one solution for efficient and effective bulk SMS communication. Our platform empowers businesses, organizations, and individuals to seamlessly reach their target audience with personalized messages, swiftly and securely.

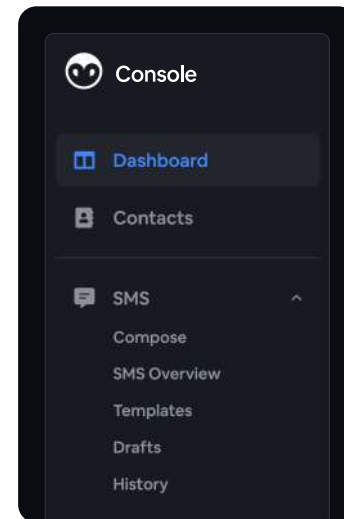

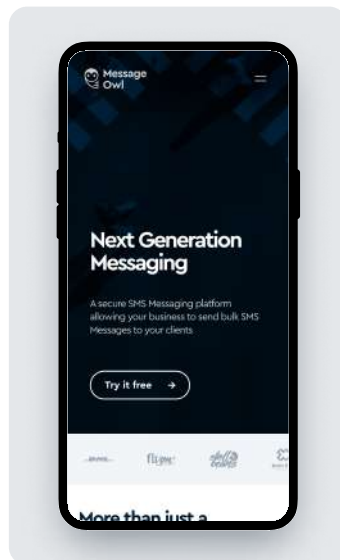

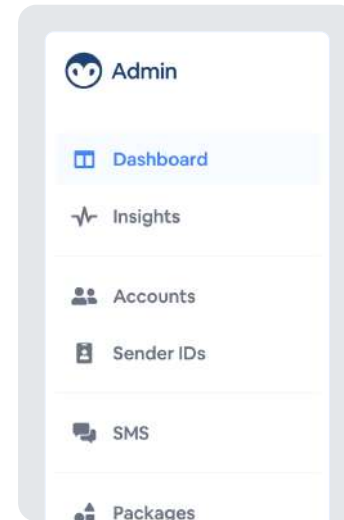

With Message Owl, you can effortlessly create and send bulk SMS campaigns tailored to your specific needs. Whether you're promoting a new product, sending out important announcements, or engaging with your customers, our user-friendly interface makes the process simple and intuitive.

Maldivian

and more

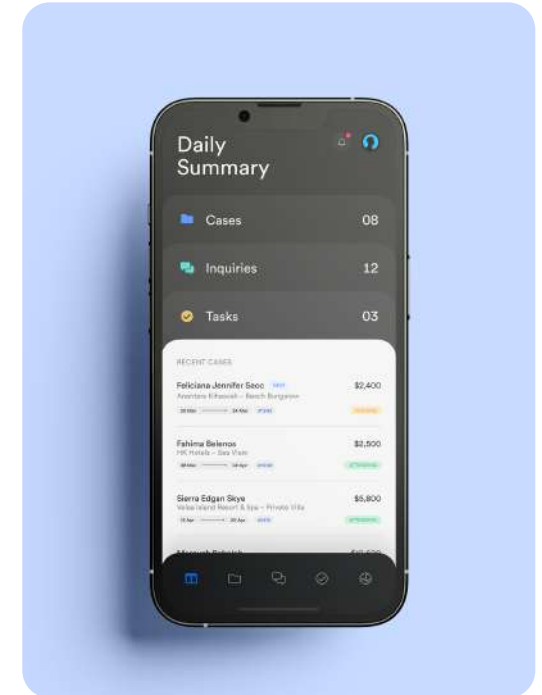

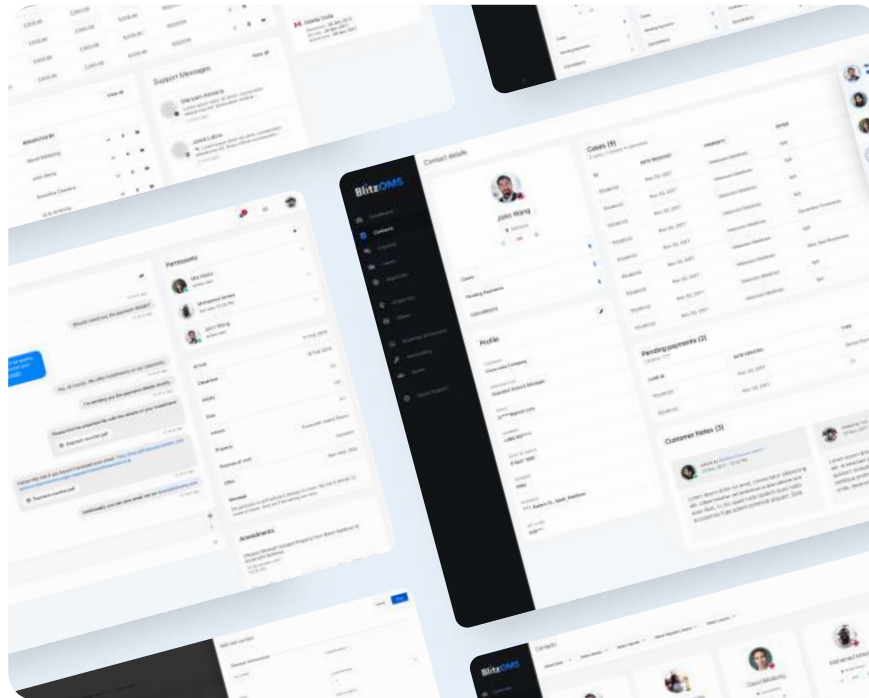

BlitzOMS

Precisely tailored CRM built for travel industry

BlitzOMS is the ultimate CRM platform designed exclusively for the travel industry. With customizable features tailored to meet the unique needs of travel agencies, tour operators, and hospitality providers, BlitzOMS streamlines operations and enhances customer relationships.

Key Features:

1. Customization: Tailor BlitzOMS to fit your business processes perfectly, with customizable fields, workflows, and reporting.
2. Client Management: Centralized client information for personalized service, from booking management to preferences and engagement history.
3. Task Management: Assign, attach files, comment easily on tasks with a few clicks.
4. Integrated Communication: Stay connected with clients and team through email, SMS, and social media, keeping them informed at every stage.
5. Analytics and Reporting: Harness data-driven insights to make informed decisions and drive strategic growth.
6. Security and Compliance: Advanced security measures to protect sensitive client data and ensure compliance with industry regulations.

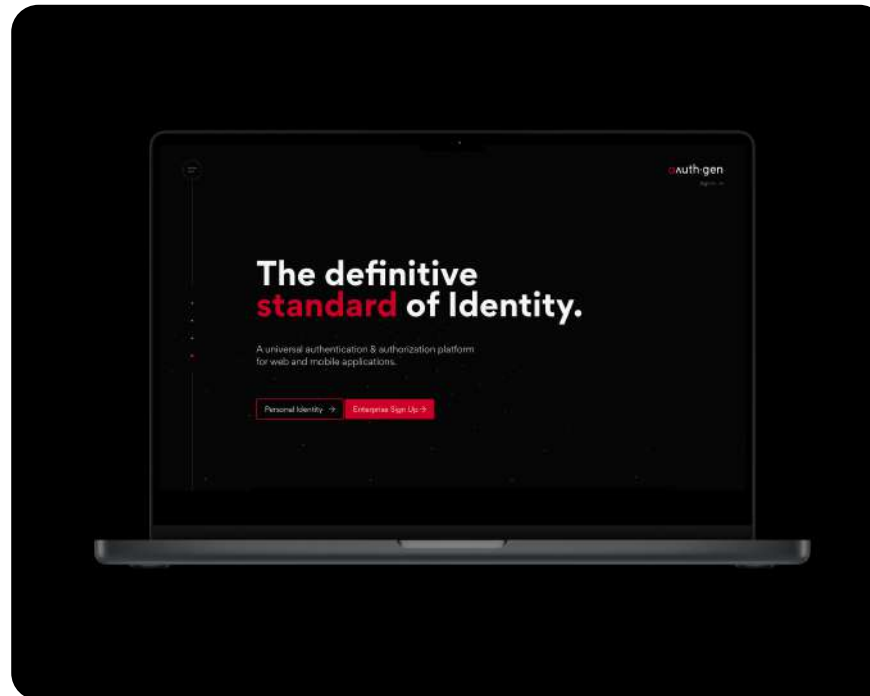

OAuthGen

A universal authentication & authorization platform for web and mobile applications.

OAuthGen is the definitive solution for seamless authentication and authorization across both web and mobile applications. This innovative platform provides businesses with a robust framework to effortlessly manage user access, ensuring security and compliance while enhancing user experience.

Key Features:

1. **Universal Compatibility:** OAuthGen supports both web and mobile applications, offering a unified solution for authentication and authorization across platforms.
2. **Secure Authentication:** Protect user accounts with industry-standard authentication protocols, including OAuth 2.0, ensuring secure access to applications.
3. **Flexible Authorization:** Define fine-grained access control policies to regulate user permissions and resource access, empowering businesses to customize authorization rules according to their specific requirements.
4. **Self-hosted White Label:** Businesses can host OAuthGen on their infrastructure, allowing for complete branding and customization, ensuring a seamless integration with existing systems and enhancing brand identity.
5. **Compliance Assurance:** Stay compliant with data protection regulations, including GDPR and CCPA, with built-in features for data encryption, consent management, and audit trails.

TLP: RED

Not for disclosure, restricted to participants only

When should it be used?

Sources may use TLP:RED when information cannot be effectively acted upon by additional parties, and could lead to impacts on a party's privacy, reputation, or operations if misused.

How may it be shared?

Recipients may not share TLP:RED information with any parties outside of the specific exchange, meeting, or conversation in which it was originally disclosed. In the context of a meeting, for example, TLP:RED information is limited to those present at the meeting. In most circumstances, TLP:RED should be exchanged verbally or in person.

TLP: AMBER

Limited disclosure, restricted to participants' organization

When should it be used?

Sources may use TLP:AMBER when information requires support to be effectively acted upon, yet carries risks to privacy, reputation, or operations if shared outside of the organizations involved.

How may it be shared?

Recipients may only share TLP:AMBER information with members of their own organization, and with clients or customers who need to know the information to protect themselves or prevent further harm. Sources are at liberty to specify additional intended limits of the sharing; these must be adhered to.

TLP: GREEN

Limited disclosure, restricted to the community

When should it be used?

Sources may use TLP:GREEN when information is useful for the awareness of all participating organizations as well as with peers within the broader community or sector.

How may it be shared?

Recipients may share TLP:GREEN information with peers and partner organizations within their sector or community, but not via publicly accessible channels. Information in this category can be circulated widely within a particular community. TLP:GREEN information may not be released outside of the community.

TLP: WHITE

Disclosure is not limited

When should it be used?

Sources may use TLP:WHITE when information carries minimal or no foreseeable risk of misuse, in accordance with applicable rules and procedures for public release.

How may it be shared?

Subject to standard copyright rules, TLP:WHITE information may be distributed without restriction.
