

OXIQA

COMPANY PROFILE

OCTOBER 2025

Empowering today's businesses with the latest in network security intelligence and infrastructure.

OXIQA is the leading Cyber Security solutions provider in the Maldives, focusing on bringing innovation to enable secure digital transformation & agile software development.

With a decade of expertise and experience in software architecture designing and implementation, we work with our clients through supporting their digital journey. As a company, who believes in learning and evolving, we work towards improving and building an innovative ecosystem that would be providing enterprise solutions to the clients.

Our Approach

We work towards empowering our clients with agile solutions using artificial and business intelligence and provide unprecedented levels of performance and customer delight to our clients. We are constantly evolving and learning to deliver innovative solutions to our clients through evidence based decision making process using big data analytics for optimal cost efficiency.

We ensure that the products we make, the actions we undertake are as challenging as it can be, so that our solutions and services would be improved, efficient, effective, evolved and optimised to the needs of our clients. Every partnership that we built is around creating a space for clients, customers and society to benefit and deliver better results.

We are passionate about what we do and strive to produce the **best solution.**

Core Team

Ismail Kaleem

[CEO – Innovation & Strategy](#)

Kaleem is a globally recognized cybersecurity researcher acclaimed by Fortune 500 companies like Facebook, Microsoft, and LinkedIn for identifying critical vulnerabilities. Celebrated in the Maldives for enhancing national cybersecurity laws, his expertise spans Cyber Offense, including red teaming and ethical hacking, significantly securing telecommunications, government systems, and banking apps. Additionally, Kaleem contributes to Cyber Defense, improving security frameworks and raising cybersecurity awareness through education and consultancy.

Hassan Junaid

[Director of Sales & Marketing](#)

Junaid, with a decade in consumer sales, specializes in customer services and channel sales, notably leading the launch of 4G and FTTH services at Dhiraagu. He founded the consumer sales team there, showcasing his leadership and strategic planning skills. Diversifying into digital marketing, he served as a consultant for Maldives.com, enhancing its online presence through social media campaigns. At OXIQA, Junaid continues to impact, notably with the success of MsgOwl, blending traditional and digital marketing strategies.

Hassan Zayan Azzam

[Director Cyber Defence, Incident Response & Blue Team](#)

Hassan Zayan Azzam, a top Cyber Security graduate from Staffordshire University, UK, is a leading professional with over 5 years of experience. Currently heading Cyber Defence Incident Response & Blue Team at OXIQA, he has been pivotal in advancing security operations and strategies since 2023. As a Security Operation Centre Engineer for the Government of Maldives (2022-2023), Hassan drafted the National Cyber Security Act and contributed to establishing the National Cyber Security Agency, focusing on strategic planning and submarine cable protection.

Mohamed Ishan

[Chief Technology Officer](#)

Ishan, with an MSc in IT and over 9 years as a full stack developer and DevOps expert, leads the technical team in crafting the company's tech strategy, emphasizing secure and efficient software development. His commitment to continuous learning and innovation is highlighted through his active participation in workshops and conferences. Notably, at the NCIT in the Maldives, Ishan played a pivotal role in digital transformations like the e-Council project, which revolutionized public service efficiency through technology integration.

Faraz Fayaz

[User Experience Architect](#)

With over 15 years of expertise in design and frontend engineering, he specializes in building user-centric platforms and scalable digital systems for government, enterprise, and national initiatives. His portfolio includes notable projects such as Message Owl, the AI Forum, and large-scale digital transformation platforms across ministries, government agencies, and enterprises. At OXIQA, he leads design and experience strategy, blending creativity with technical precision to deliver impactful products.

Mohamed Leewan

[Enterprise Sales Engineer](#)

As Lead of Enterprise Sales, Leewan leverages deep fintech expertise to drive strategic business growth. His Banking & Finance (BSc) foundation is enhanced by hands-on experience in digital financial services, including leadership roles in Ooredoo Maldives' digital wallet initiative as Product Owner and Customer Engagement lead. Prior experience at Mauritius Commercial Bank brings valuable banking sector insights to his current role, reflecting a commitment to transforming financial services through innovative sales strategies.

As a purpose-built [cybersecurity organization](#), we maintain an unwavering commitment to excellence in digital protection. Our team of security specialists brings proven experience and cutting-edge methodologies to deliver exceptional cybersecurity services tailored to modern threat landscapes.

By operating as a dedicated subsidiary, we combine the trusted foundation of OXIQA's security heritage with the agility and specialized focus needed to stay at the forefront of cybersecurity innovation. At IQDot, we're not just continuing a legacy, we're advancing it with singular dedication to protecting our clients' digital assets.

The value we add to your business

IQDot provides complete data control and management. The rate of development in internet, mobile, distributed computing, and other technologies is just mind-boggling. Even a well-established business can be doomed if it fails to keep up, but bringing in these new capabilities without fully adequate security processes and systems can be as fatal.

Service Portfolio

Cyber Security

Our portfolio combines proactive red teaming, defensive operations, and immersive simulations to help organizations detect threats early, respond faster, and build long-term resilience.

Our teams operate 24/7 to defend against evolving threats, while equipping your staff with the skills to withstand modern attacks.

Core Capabilities

- **Red Team Services:** Simulated adversary campaigns, vulnerability and penetration testing, social engineering exercises, and exploit development to identify weaknesses before attackers do.
- **Blue Team Services:** Continuous monitoring via SOC operations, proactive threat hunting, rapid incident response, advanced forensics, and modern endpoint/XDR defense.
- **Simulation & Training:** Breach and attack simulations, phishing awareness campaigns, and hands-on cyber range training to prepare teams for real-world threats.

Technology Partners:

Trusted By: Ministries, Banks, Hoteliers, Telecoms, Hospitals, and Enterprises.

RED TEAM

Offensive Security

Expose vulnerabilities before attackers do. Simulated adversary campaigns, exploit development, and social engineering assessments.

Security Audits & VAPT

Comprehensive internal and external assessments, including configuration reviews across M365, firewalls, networks, and infrastructure platforms.

Social Engineering Assessments

Simulated phishing, pretexting, and on-site intrusion attempts that test and strengthen employee awareness.

GAP / Strategic Assessments

Measure current maturity against targets, prioritize gaps, and produce a roadmap with practical, staged improvements.

Benefits

Reduce the risk of costly breaches by addressing vulnerabilities early.

Train staff and technical teams through controlled but practical attack simulations.

Gain a realistic view of your organization's resilience against modern threats.

BLUE TEAM

Defensive Security

Detect threats early, respond quickly, and strengthen resilience.
Continuous monitoring, incident response, and forensic analysis.

Security Operations Center (SOC)

Always-on SOC monitoring across networks, endpoints, HCI, virtualization, backups, and security tools with enforceable SLAs.

Managed Detection & Response (MDR)

Certified responders deploy and manage XDR, providing monitoring, triage, investigation, and remediation with tight SLAs.

PAM/DAM Solutions

Modern privileged access and data access management with vaulting, approvals, session recording, and automated rotation.

Managed Firewall

Design, deploy, and operate next-generation firewalls with policies, updates, threat intelligence, and high availability assurance.

Benefits

Maintain 24/7 protection across critical environments.

Minimize downtime with rapid, coordinated response to attacks.

Strengthen defenses through continuous detection and insight.

Governance, Risk, & Compliance (GRC)

Strengthen governance, reduce risks, and stay compliant. Frameworks, audits, and practical roadmaps for resilient organizations.

Managed Compliance Services

End-to-end compliance program management with platform, readiness, audits, and expert guidance to sustain certification continuously.

Compliance Audits

Accredited assessments for PCI DSS, ISO 27001, SWIFT CSP, and SOC 2 with remediation guidance.

Business Continuity & Disaster Recovery Audit

Validate business continuity and disaster recovery posture, testing RTO, RPO, backups, failover processes, and governance.

Benefits

Break silos by aligning strategy, operations, and oversight

Unlock trust with transparent controls and accountable actions

Enable agility by adapting governance to shifting risks

Artificial Intelligence & Sovereign AI

Enabling enterprises and governments to harness AI responsibly, with on-premise infrastructure, practical applications, and sovereign frameworks that ensure compliance and data independence.

AI Infrastructure

On-premise GPU clusters and sovereign AI platforms built for secure model training, hosting, and inferencing.

AI Applications

Automatic Speech Recognition, TTS, and analytics platforms that deliver smarter citizen and enterprise services.

Agentic AI

Autonomous AI assistants that orchestrate decisions, streamline workflows, and accelerate efficiency.

AI Governance & Security

Frameworks for compliance, lifecycle management, and safeguarding AI models against misuse or attack.

Benefits

Enable digital sovereignty with secure, on-prem AI deployments.

Enhance services with voice, language, and predictive AI apps.

Build trust with compliant and secure AI frameworks.

Products

Message Owl

A secure SMS Messaging Console

Message Owl is your all-in-one solution for efficient and effective bulk SMS communication. Our platform empowers businesses, organizations, and individuals to seamlessly reach their target audience with personalized messages, swiftly and securely.

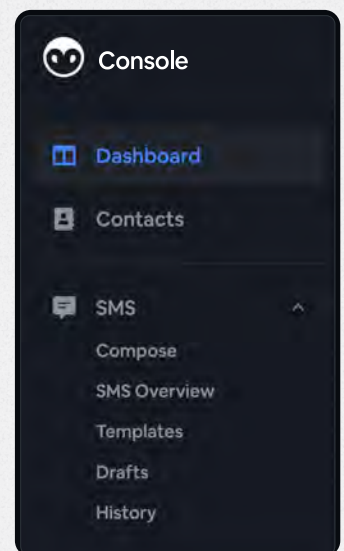

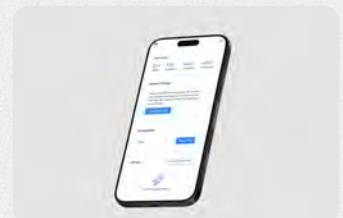

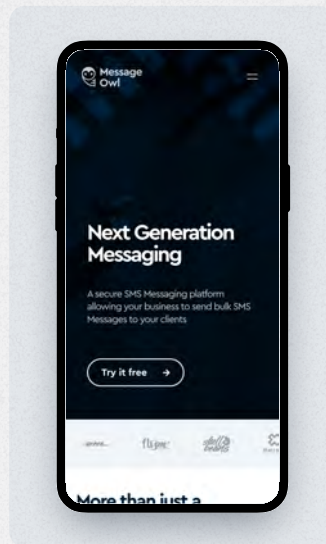

With Message Owl, you can effortlessly create and send bulk SMS campaigns tailored to your specific needs. Whether you're promoting a new product, sending out important announcements, or engaging with your customers, our user-friendly interface makes the process simple and intuitive.

maldivian

and more

Thaana.ai

AI-Powered Language Platform

An artificial intelligence platform developed for Dhivehi language processing, offering tools for text, voice, and natural language applications. Core features include transcription, translation, and speech technologies optimized for local use. The platform is designed for scalability across education, media, and enterprise needs. Thaana.ai serves as a foundation for advancing AI adoption in the Maldivian context.

and more

Synetecs Agent

Intelligent Bilingual Text & Voice Agent

Our advanced voice agent delivers seamless customer service in multiple languages, including Dhivehi and English. The system adapts to your specific knowledge base, executes tasks like ticket creation and booking requests, and operates through real phone calls for natural interactions. Every conversation is automatically analyzed to provide call summaries, intent identification, and sentiment analysis, giving you actionable insights while reducing operational costs. Perfect for aviation, hospitality, and customer-facing industries seeking to enhance service quality and efficiency.

Key Features

- Multilingual Support:** Natural voice interactions in Dhivehi, English, and other languages to serve diverse customer bases.
- Task Automation:** Executes requests such as ticket creation, booking confirmations, and knowledge-base queries with accuracy.
- Real-Time Analysis:** Provides call summaries, intent recognition, and sentiment analysis for actionable insights.

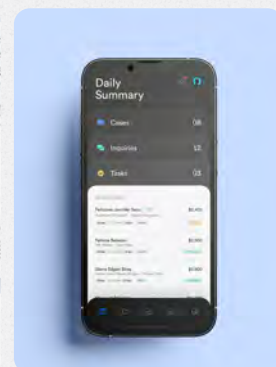

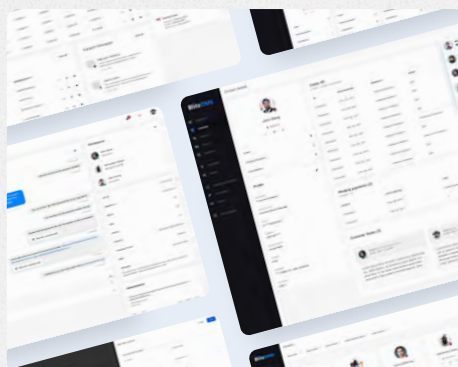

BlitzOMS

Precisely tailored CRM built for travel industry

BlitzOMS is the ultimate CRM platform designed exclusively for the travel industry. With customizable features tailored to meet the unique needs of travel agencies, tour operators, and hospitality providers, BlitzOMS streamlines operations and enhances customer relationships.

With combined client management, task automation, and integrated communication into a single platform, BlitzOMS gives businesses personalized tools to operate efficiently.

OAuthGen

A universal authentication & authorization platform for web and mobile applications.

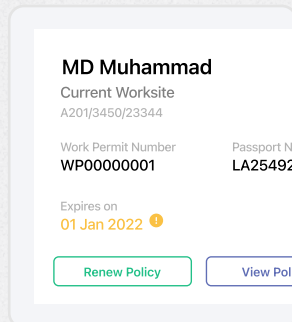

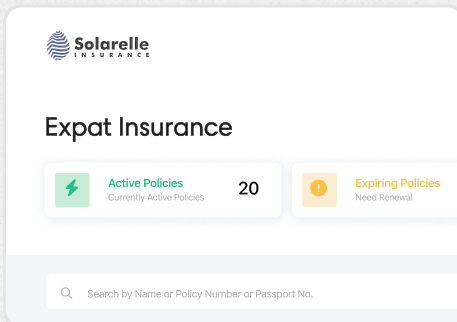

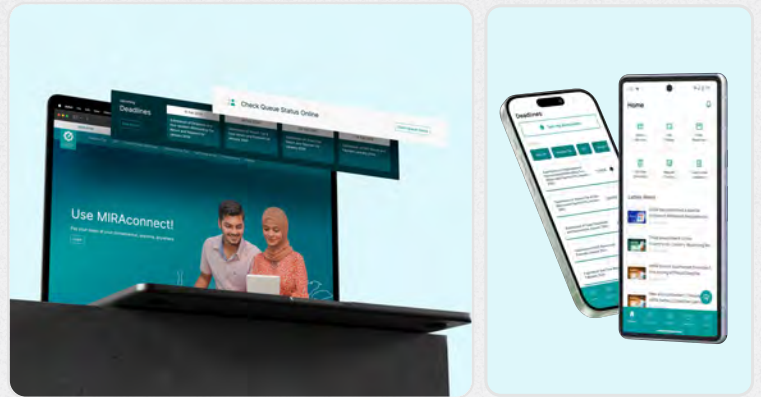

OAuthGen is the definitive solution for seamless authentication and authorization across both web and mobile applications. This innovative platform provides businesses with a robust framework to effortlessly manage user access, ensuring security and compliance while enhancing user experience.

Projects

Maldives Inland Revenue Authority Website & Mobile Application

A comprehensive web and mobile platform developed to streamline tax filing, payments, and inquiries with a user-centric design. The solution integrates secure architecture, real-time updates, and personalized tax guidance to improve compliance. Scalable systems were deployed to handle high transaction volumes while reducing wait times and administrative workload. The result is a reliable digital service enhancing efficiency for both citizens and the authority.

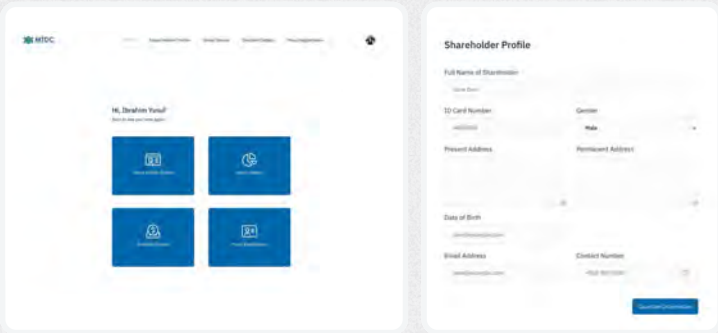

Solarelle Internal Portal

An innovative internal portal for a leading insurance company, designed to streamline operations and enhance employee engagement. It offers tools for claims processing, customer management, and internal communications. With advanced analytics, managers can track performance and spot trends for better decision-making. The platform's intuitive design and personalized experience have significantly improved productivity and collaboration within the company.

Kaathibu Speech to Text Platform

Kaathibu is an advanced speech-to-text platform crafted specifically for the Dhivehi language. It seamlessly converts spoken Dhivehi into precise written text, enhancing communication, transcription, and documentation tasks. With its user-friendly interface and high accuracy, Kaathibu efficiently captures and processes spoken content, making it an essential tool for both personal and professional applications.

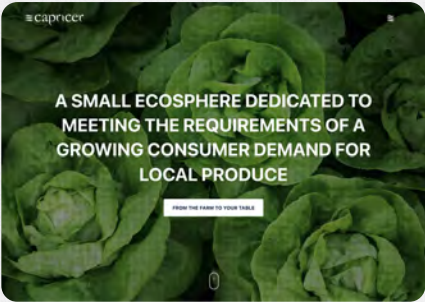

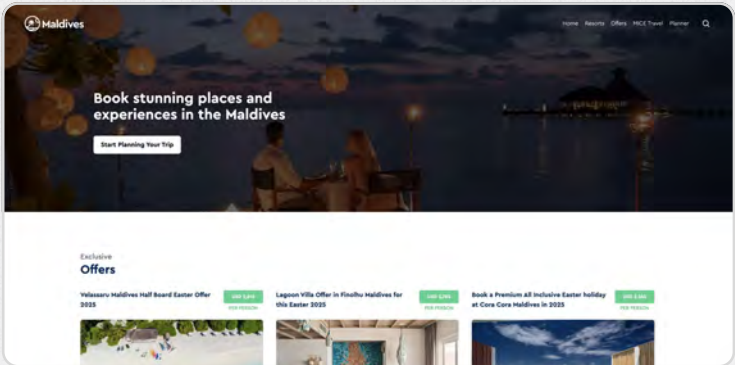

MTDC
Shareholder Portal

A sophisticated platform designed to enhance investor relations and corporate transparency. This secure, interactive site offers shareholders immediate access to financial reports, stock data, and corporate news. Featuring a customized dashboard, the portal provides insights into dividend history, voting rights, and upcoming meetings. With tools for direct communication and electronic voting, it fosters an engaged investor community and highlights the company's commitment to accountability and shareholder value.

Maldives.com
Hospitality & Booking Engine

Capricer's corporate website stands as a beacon of brand identity and professionalism. Designed with elegance and sophistication, the website reflects Capricer's commitment to excellence and innovation. It offers visitors a comprehensive insight into the company's services, achievements, and core values through immersive content and interactive features. The website also includes an advanced portfolio gallery, showcasing Capricer's projects and collaborations, which serves to attract potential clients and partners by highlighting the company's expertise and success stories.

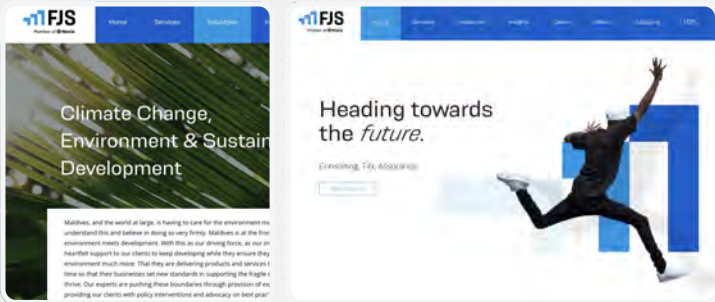

Capricer
Corporate Website

Capricer's corporate website embodies elegance and professionalism, showcasing the company's commitment to excellence and innovation. It provides a detailed overview of services, achievements, and values through immersive content and interactive features. An advanced portfolio gallery highlights Capricer's projects and success stories, attracting potential clients and partners.

FJS
Corporate Digital Presense

FJS's digital presence reflects its forward-thinking approach and industry leadership. With a clean, modern design, the website offers a user-friendly experience, showcasing the company's history, services, and future vision. Interactive features like video testimonials and case studies highlight FJS's impact and capabilities. A dynamic news section keeps stakeholders updated on the latest developments, achievements, and insights.

Initiatives

Maldives AI Forum

National Technology Forum on Artificial Intelligence

AI Forum Maldives is a flagship initiative bringing together policymakers, industry leaders, researchers, and innovators to explore the opportunities and challenges of artificial intelligence. Designed as a national platform, the forum creates dialogue on AI adoption, governance, and local innovation, while showcasing cutting-edge solutions tailored for the Maldives and the wider region.

The event combines thought leadership sessions with product showcases, fostering collaboration between government, private sector, and academia. With a strong focus on applied use cases, the forum demonstrates how AI can enhance national services, improve business operations, and prepare the workforce for emerging technologies.

Highlights

- Keynotes from global and regional experts on AI adoption and strategy.
- Panel discussions on ethics, cybersecurity, and sector-specific applications.
- Exhibition spaces featuring local startups and enterprise AI solutions.
- National branding, stage design, and digital presence crafted to reflect Maldivian identity.
